CAREER OBJECTIVE

Computer Science Engineering graduate with hands-on experience in full-stack web development using .NET, Next.js, Python, and SQL. Currently developing expertise in Java, software testing, and Selenium automation. Seeking an entry-level software development or testing role to apply strong programming and problem-solving skills.

WORK EXPERIENCE

Full-Stack Software Development Intern

Chatbot Solutions Pvt. Ltd.

Oct 2025 – Apr 2026 / Bhubaneswar

- Architected RESTful APIs with C# (.NET Core) and optimized PostgreSQL database queries.
- Built responsive user interfaces and dynamic web components using Next.js and React.
- Developed Grievance Management System with automated ticket routing and database state verification.

Web Development Intern

Web Bocket Pvt. Ltd.

Jun 2024 – Jul 2024 / Bhubaneswar

- Developed responsive MERN stack web interfaces and modular UI components using React, Node.js, and Tailwind CSS.

Core Java Intern

OCAC Training Center

Jul 2023 – Aug 2023 / Bhubaneswar

- Implemented core java programs, object-oriented design patterns, and algorithmic logic.

PROJECTS

AgroNXT – AI Agricultural Intelligence Platform

- What It Is: A web platform delivering precision crop advisories, yield predictions, and market tracking.
- Tech Stack: Built using Next.js, Python (FastAPI) REST APIs, and Supabase PostgreSQL with Render deployment and JWT security.
- Core Features: Integrated weather API widgets, AI crop recommendation filters, and real-time yield calculators.

GMS – Grievance Management System

- What It Is: A web based system built to automate, route, and resolve institutional user grievance tickets.
- Tech Stack: Engineered using Next.js, C# (ASP.NET Core) REST APIs, PostgreSQL database, and JWT authentication.
- Core Features: Built role-based admin dashboards, automated ticket status workflows, and audit trail logs.
